

Stelburg Aggressive Portfolio

30 November 2021

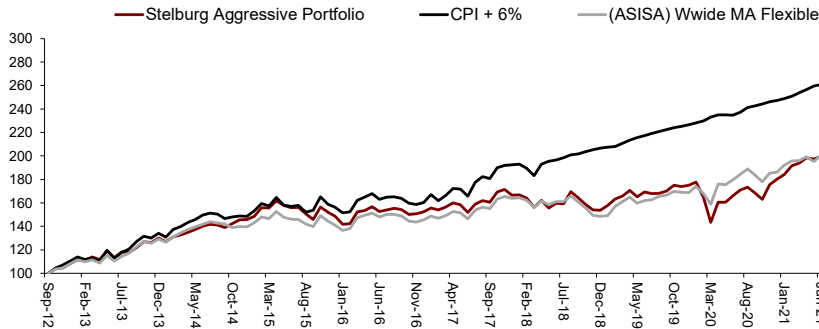

Stelburg
INVESTMENTS

Investment Objectives

The Portfolio invests in a flexible combination of investments in the equity, bond, money, property markets and off-shore asset classes and will at all times remain within Prudential Guidelines. The underlying risk and return objectives of individual portfolios may vary as dictated by each portfolio's mandate and stated investment objective and strategy. These portfolios may be aggressively managed with assets being shifted between the various markets and asset classes to reflect changing economic and market conditions and the manager is accorded a significant degree of discretion over asset allocation to maximise total returns over the long term.

Cumulative Performance

Performances as at 30 November 2021

Returns for periods longer than 1 year are annualised

Disclaimers

Past performance of any investment is not necessarily a guide to the future. All performance figures to 30 June 2017 are calculated on a money-weighted return. The money weighted rate of return (MWRR) is the actual return calculated on total portfolio value, net of underlying asset management fees. Size and timing of cash flows are taken into account. From 01 July 2017, the portfolio returns are calculated based on an investment in a tracker/index fund which is a time-weighted return and ignores the effect of cash flows. Performance is reported net of the Portfolio Management Fee but before the deduction of any Platform Administration Fees or Financial Advisor Fees. The value of the portfolio and any income arising from it may fall as well as rise due to fluctuations in the value of the underlying funds, income distributions and changes to interest rates. Neither the capital nor distributions are guaranteed. The exposures indicated by the graphs may differ from time to time due to market movements, fund limitations and the relevant Portfolio Manager's discretion. The risk rating of the portfolio is based on the asset class composition and return objectives of the portfolio. Deductions of charges and expenses mean that you may not get back the amount you invested. There can be no assurance that the performance of the funds within the portfolio will achieve your stated objectives. The portfolio may contain shares or units in funds that invest internationally. The value of your investment and the income arising from it may therefore be subject to exchange rate fluctuations. Investment in the portfolio may not be suitable for all investors. Investors should obtain advice from their financial advisor before proceeding with an investment. All fees are quoted including VAT. Unit trusts are medium to long term investments. This document is for the sole use of the intended recipient and may not be reproduced or circulated without the prior written approval of Stelburg Investments and to do so may constitute an infringement of any local laws or regulations.
