

Stelburg Income Portfolio

31 July 2019

Investment Objectives

The Stelburg Income Portfolio is a diversified fixed income portfolio of domestic and global asset classes. The Portfolio aims to provide a reasonable level of income, taking into account current levels of interest rates and dividend yields. The global exposure of the overall Portfolio will be based on that of the underlying funds. A multi-manager approach is utilised whereby fund managers are combined based on their skills and expertise. The Portfolio may invest in foreign assets as permitted by legislation and complies with Regulation 28 of the Pension Funds Act, 1956.

Cumulative Performance

Performances as at 31 July 2019

Disclaimers

Past performance of any investment is not necessarily a guide to the future. Performance figures until 30 September 2018 are calculated on a simulated back tested basis using the portfolio holdings (or equivalents). For back tested returns, these portfolio holdings are not reflective of our historic asset allocation views, or any changes, which would have been made to the portfolio holdings over time. From 01 October 2018, the portfolio returns are calculated based on an investment in a tracker/index fund which is a time-weighted return and ignores the effect of cash flows. Performance is reported net of the Portfolio Management Fee but before the deduction of any Platform Administration Fees or Financial Advisor Fees. The value of the portfolio and any income arising from it may fall as well as rise due to fluctuations in the value of the underlying portfolios, income distributions and changes to interest rates. Neither the capital nor distributions are guaranteed. The exposures indicated by the graphs may differ from time to time due to market movements, portfolio limitations and the relevant Portfolio Manager's discretion. The risk rating of the portfolio is based on the asset class composition and return objectives of the portfolio. Deductions of charges and expenses mean that you may not get back the amount you invested. There can be no assurance that the performance of the funds within the portfolio will achieve your stated objectives. The portfolio may contain shares or units in portfolios that invest internationally. The value of your investment and the income arising from it may therefore be subject to exchange rate fluctuations. Investment in the portfolio may not be suitable for all investors. Investors should obtain advice from their financial advisor before proceeding with an investment. All Fees are quoted including VAT. Unit trusts are medium to long term investments.
